School's Back And It's Time To Make Sure Your Kids Are Vaccinated

When & Which Vaccines Does Your Child Need For School?

Parents:

If you have never received a Tdap vaccine, you need one as well to keep you and your family safe from the whooping cough.

Questions? Call your child's doctor or the school nurse for more information.

*Disclaimer: The vaccines listed are required by SC State law for students attending public school. Your child's doctor might recommend additional vaccines.
