Telemedicine in Chester County

You will be excited to know that Chester Park Complex offers a telemedicine program for its students. Below are some of the features and benefits of the program.

Why Telemedicine Rocks

Telemedicine is a unique program that.....

- ✓ Incorporates education and technology with healthcare.
- ✓ Allows patients to be seen from a distance without having to visit the doctor's office.
- ✓ Uses technology such as computers and the Internet to communicate with patients.

Features of the Telemedicine Program at Chester Park Complex

- ✓ **Students can be seen while at school**

A doctor can check the status of a student's condition remotely from a computer screen.

- ✓ **Doctors can perform a check-up and tests**

The doctor can listen to a student's heart and lungs, see the ears and throat and test for the Flu and Strep.

- ✓ **Send prescriptions remotely**

Prescriptions are sent to the pharmacy where parents can pick them up on their own time.

- ✓ **Saves money and time**

Students don't need to leave school to see a doctor and parents don't have to be present for the telemedicine visit.

This service is funded by a grant from the Chester Healthcare Foundation.
